

Air National Guard, McGuire AFB, New Jersey

GTS Consultants prepared topographic and utility survey to support the design of improvements to a New Jersey Air National Guard fueling facility (upper left) at McGuire Air Force Base, Wrightstown, New Jersey. The survey included the detailed location and mapping of surface utility features, storm and sanitary sewer systems, buildings, curb lines, sidewalks, parking lots, overhead wires, and fences. Drawings were prepared in electronic (AutoCAD) format to client specifications.
